EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

Comment on Submission

1. This communication is responsive to submission of 2 February 2005.

Allowable Subject Matter

2. Claims 1 and 3-11 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art does not disclose or fairly suggest a method of calibrating a spectroscopic device for providing a non-invasive measurement of an analyte level in a sample comprising the selection of a calibration algorithm corresponding to a predicted set of analyte levels within an upper and lower limit of range and slope to calculate a suitability score as the appropriate calibration algorithm.

The examiner notes that while it is known in the art to calculate a predicted set of analyte levels based on range, slope and R^2 for multiple calibration algorithms (see for example *Rosenthal et al* – US 5,576,544 – col. 2 and line 66, col. 5 and lines 65-67, col. 6 and lines 1-24), the prior art does not fairly suggest a different algorithm selected from multiple calibration algorithms for use in a first and second calibration where the same algorithm used in the first calibration can be used to calibrate both a higher and lower range in the second calibration.

4. The remaining claims are allowable based on their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
